MATCH THE QUOTE TO THE CHARACTER

- 1 "Sunshine, daisies, butter mellow, turn this stupid, fat rat yellow!"
- 2 "Fine day, Sunday. In my opinion, best day of the week."
- 3 "Clearly, Potter, fame isn't everything."
- 4 "You're sneaking out again, aren't you?"
- 5 "Now, if you two don't mind, I'm going to bed before either of you come up with another clever idea to get us killed. Or worse, expelled."
- 6 "You're a wizard, Harry!"
- 7 "Troll in the dungeon!"
- 8 "It does not do to dwell on dreams and forget to live."
- 9 "It's true, then. Harry Potter has come to Hogwarts."
- 10 "Dad, look! Harry's got a letter!"
- 11 "I'm not going home...not really."
- 12 "This boy will be famous. There won't be a child in our world who doesn't know his name."

Harry Potter QUIZ

1. What is the name of the family that Harry lives with?

- A. The Malfoys
- B. The Weasleys
- C. The Muggles
- D. The Dursleys

2. Who directed the movie *Harry Potter and the Philosopher's Stone*?

- A. Chris Columbus
- B. Alfonso Cuarón
- C. Mike Newell
- D. David Yates

3. How old is Harry when he begins his first year at Hogwarts School of Witchcraft and Wizardry?

- A. 10
- B. 11
- C. 12
- D. 13

4. Who plays Professor Albus Dumbledore in *Harry Potter and the Philosopher's Stone*?

- A. Richard Harris
- B. Richard Griffiths
- C. Alan Rickman
- D. Robbie Coltrane

5. Which one of Ron Weasley's siblings does not attend Hogwarts during Harry's first year?

- A. Percy
- B. Fred
- C. George
- D. Ginny

6. When Hagrid first appears in the movie *Harry Potter and the Philosopher's Stone*, what is he riding?

- A. Broom
- B. Magic Carpet
- C. Flying Motorcycle
- D. Flying Car

Answers: 1-D, 2-A, 3-B, 4-A, 5-D, 6-C

DIY QUILL

EQUIPMENT & MATERIALS: 1 piece of plain white paper, a pair of scissors, glue stick and pencil.

STEP 1: Fold a piece of A4 paper in half

STEP 6: Roll the flaps around the pencil and seal the edges with a glue stick.

STEP 2: Place the pencil on the paper, so that just the pointy end is off the edge of the paper. Using a glue stick, draw a line of glue all the way around the outside of the pencil.

STEP 7: Using scissors, cut the outline of your quill feather around the pencil. You can draw it on with another pencil first.

STEP 3: Fold the paper over and pinch it together around the pencil.

STEP 8: Starting from the bottom, cut diagonally down from the edge of the paper towards the pencil.

STEP 4: Approx. 1 ½ inch from the bottom, cut a slit from the edge of the paper towards the pencil.

STEP 9: Leave 1mm gap and do the same again, all the way around.

STEP 5: Leaving ½ inch gap from the pencil, make another cut from the bottom of the paper, leaving two flaps either side.

STEP 10: There you have it! Enjoy using your new favorite pencil.

ACTIVITIES

MAKE YOUR OWN POTIONS JAR

YOU'LL NEED:

- An empty jar or bottle with a lid.
- Some unusual, unused items from around house, e.g. sticks, broken toy, ribbon, scrap paper (these are going to be the contents of your potions jar).
- A label for your jar or bottle.
- Gather your “ingredients” and decide how you’d like to display them inside the jar. To make the contents more magical, you could paint them.
- Once you are happy, place the items into your jar or bottle. Put the lid on your jar or bottle, add your label and give your potion a name!

ACTIVITIES

Harry Potter FAN CLUB

Hogwarts Castle Build

THIS
ACTIVITY
INVOLVES
SHARP TOOLS,
AND ADULT
SUPERVISION IS
REQUIRED

Part 1: The Great Hall

To make the Great Hall, you will need:

1 large cardboard
box measuring
about 30x20x20cm

1 small cardboard
box measuring
about 22x6x10cm

Lots of pieces of
cardboard

Strong tape

Scissors

A marker pen

A pencil

A love of
Harry Potter!

These instructions feature the use of sharp tools so adults should always supervise children

Visit www.harrypottermovie20.com
for more activities and inspiration

PART 1: The Great Hall Instructions - Page 2

1.

Take a big cardboard box measuring about **30x20x20cm**. This will be your Great Hall. Tape it closed to keep it strong.

2.

Take a piece of cardboard around **25cm** long and **30cm** wide and fold it in half to create the roof. Tape it to the top of your box.

3.

Measure the size of the triangle gaps of your roof and cut it out of cardboard. Tape it in place to create a solid shape.

4.

Take a smaller box measuring about **22x6x10cm** to create the Entrance Hall. Cut a triangle down from the top of about 6cm down to create the shape of the roof.

5.

Take two pieces of card of about **6x9cm**, tape together, and attach to create the roof.

6.

Draw on the shape of the door to the Great Hall and a large opening above it and then cut them out with scissors. Attach the Entrance Hall to the end of the Great Hall.

7.

To make the turret in the middle of the hall, take a small piece of cardboard of about **8cmx10cm** and bend it in half. Sorting Ceremony this way!

8.

Then bend each half in half again to make a rectangular tube. Tape it in place.

PART 1: The Great Hall Instructions - Page 3

9.

Cut two small triangles in the bottom at opposite sides of the tube, so it can sit on top of the roof of the hall.

10.

Take a piece of flexible card and roll it into a cone. Tape it in place and cut off the excess.

11.

Put it on top of the tube and attach the turret to the middle of the roof.

12.

Do the same for the two turrets at either end of the roof, but only cut **one** triangle in the bottom to attach to the ends of the roof.

13.

To make the turrets around the outside you need 12 pieces of card of about **26x6cm**. Fold them into rectangular tubes and tape in place.

14.

To make the triangle-shaped roofs, draw around the square end of the tube on to a thin piece of card. Draw a small triangle from each side of the square and cut the shape out.

15.

Fold the triangles up toward the middle and tape in place. Attach the roofs to the top of each of your 12 turrets. Post owls would love to perch on these!

16.

Tape a turret to each side of the Entrance Hall and attach five along each side of The Great Hall.

Hogwarts Castle Build

THIS
ACTIVITY
INVOLVES
SHARP TOOLS,
AND ADULT
SUPERVISION IS
REQUIRED

Part 2: The Grand Staircase Tower

To make the Grand Staircase Tower, you will need:

2 large pieces of
flexible card

Lots of bits of
cardboard

Strong tape

Scissors

These instructions feature the use of sharp tools so adults should always supervise children

Step by Step Instructions

1.

Take a big flexible piece of card of approximately **40cm x 45cm** and roll it into a cylinder. This will be your Grand Staircase Tower. Tape it in place.

2.

Take a thicker piece of cardboard measuring about **10cm by 45cm** and roll it around the top of the cylinder. Tape in place.

Visit www.harrypottermovie20.com
for more activities and inspiration

PART 2: The Grand Staircase Tower Instructions - Page 2

3.

Take another piece of flexible card and roll it into a cone shape. Tape in place and trim off the excess card. Place it on top of the tower.

4.

To make the three turrets for the Headmaster's Tower, we need a base for them to sit on. Cut a small piece of cardboard of about 5x5cm and bend it into a rectangular tube and tape in place. Cut across the bottom at a slant so that it can sit against the roof of the tower.

5.

Take a piece of flexible card and cut it into three pieces about 4cm long. Roll them into three tubes and tape into place.

6.

Just as with the Grand Staircase Tower, make three little cone roofs to go on top of the cylinders.

7.

Tape the three cylinders together, placing each one 1cm below the one to the left.

8.

Attach the three cylinders to the base and attach all the pieces to the side of the Grand Staircase Tower roof.

9.

To create a corridor to connect the Great Hall to the Grand Staircase Tower, cut two pieces of cardboard for the walls and two for the roof. Tape the two roof pieces together.

10.

Tape the walls between the right side of the Entrance Hall and the Grand Staircase Tower. Attach the roof to the top of the walls between the two buildings. You may need to cut the side of the roof to fit the angle of the Entrance Hall roof.

Hogwarts Castle Build

THIS
ACTIVITY
INVOLVES
SHARP TOOLS,
AND ADULT
SUPERVISION IS
REQUIRED

Part 3: Paper Mache and Paint

To paper mache and paint your Hogwarts Castle, you will need:

And for the base of the castle you will need:

These instructions feature the use of sharp tools so adults should always supervise children

Step by Step Instructions

1.

Mix 1 part water with 2 parts PVA.
Just like a Potions lesson!

2.

Take strips of newspaper or tissue paper and dip it into the mixture. Place it on the castle over any joins or over tape that can't easily be painted on.

Visit www.harrypottermovie20.com
for more activities and inspiration

PART 3: Paper Mache and Paint Instructions - Page 2

3.

Once dry, paint all the roofs a dark grey colour. A sponge is useful to get even coverage.

4.

Mix your yellow and brown paints to create a sandstone colour.

5.

Paint the walls of the castle. Leave to dry.

6.

Using your black paint and paintbrush, paint 4 windows on each of the end turrets of the Great Hall...and one on each side of the central turret.

7.

Paint one long and one short window between each of the side turrets on the walls of the hall. Paint a window on each side of the Entrance Hall.

8.

To create your window template, fold a piece of card or thick paper in half. Using your ruler, measure down the folded side to make small marks 1cm apart.

9.

Measure 0.5cm across from the top and bottom mark and draw a line down the paper to join them. Use your scissors to cut between every other centimetre.

10.

Open the paper to reveal a line of squares. Cut the excess edges off.

PART 3: Paper Mache and Paint Instructions - Page 3

11.

Line your template over the Grand Staircase Tower. Use your black paint and sponge to create the small windows. Leave to dry.

12.

Find a box big enough to act as the castle base. Ours is 40x22x37cm.

13.

Pour some PVA glue into a bowl. Take pieces of your packing paper and screw them up into balls.

14.

Apply a light layer of glue onto the surface of your base box. Dip one side of the ball into the PVA glue and press against the side of the box to attach to the base.

15.

Continue to do this until your base is covered then leave to dry. It should be firmly in place as though you've used a Permanent Sticking Charm!

16.

Cover the base with grey paint.

17.

To add some moss and grass, use your small sponge and green paint to dab some colour around the rocks.

18.

Your Hogwarts Castle is complete! Let your wizarding adventures begin...

HOGWARTS FIRST YEARS' ZUCCHINI BOATS

As we see in *Harry Potter and the Philosopher's Stone*™, first-year students get their first awe-inspiring sight of Hogwarts castle from a small fleet of boats led across the Black Lake by Hagrid. Inspired by that iconic moment, these delicious zucchini boats are filled with sausage, cheese and pepperoni. An easy, low-carb dish you can keep as a side or turn into an entrée, these boats can (and should!) be arranged in the shape of the small Hogwarts flotilla ferrying students to school for the first time.

WHAT YOU WILL NEED:

(Yield: 8 boats)

4 large zucchini

1 pound bulk Italian sausage

1 tablespoon olive oil

½ large onion, diced

Salt and fresh ground black pepper

1 cup shredded mozzarella cheese

½ cup pepperoni slices

- 1 Preheat the oven to 375°F.
- 2 Slice each zucchini in half lengthwise. Use a spoon to scoop out some of the pulp, leaving about half an inch of flesh for stability. Reserve pulp.
- 3 Heat oil in a large sauté pan over medium heat. Cook sausage and onion until sausage is brown, 7 to 10 minutes. Add reserved zucchini pulp to the pan with the sausage and onion. Continue cooking until sausage is cooked through and onions are translucent, 5 to 7 minutes. Season with salt and pepper to taste.
- 4 Place the zucchini boats on a baking sheet lined with parchment paper. Divide the sausage-and-onion mix evenly among the boats. Top with shredded mozzarella cheese and finish with pepperoni slices.
- 5 Bake 20 minutes for firm boats, longer if you want the zucchini to be softer.
- 6 Arrange the boats on a serving board in the shape of the Hogwarts flotilla. Serve hot.

ADULT
SUPERVISION
REQUIRED

HOGWARTS EXPRESS SMOKEY SLIDERS

The Hogwarts Express appears in each of the *Harry Potter* films, traveling from King's Cross Station in London to Hogsmeade and back again with a trainful of young wizards and witches off to begin their magical studies. Inspired by the billowing smoke of the Hogwarts Express, these sliders have a delicious, smoky flavor profile and make a great main dish or appetizer, depending on how many passengers you're serving.

WHAT YOU WILL NEED:

(Yield: 6 servings as an entrée; 12 or more as an appetizer)

FOR THE ROASTED RED PEPPER MAYO

1 cup mayonnaise
½ cup minced roasted red bell pepper
½ teaspoon smoked paprika
½ teaspoon ancho chile powder
¼ teaspoon cayenne pepper

FOR THE PATTIES

2 pounds ground beef
1 pound sliced bacon, divided
1 cup shredded Gouda (about a 3-ounce block)
1 teaspoon kosher salt
1 teaspoon smoked paprika
1 tablespoon ketchup

FOR THE SLIDERS

24 slider rolls, preferably "brown and serve" style
¼ cup (½ stick) butter, melted
½ teaspoon ancho chile powder
2 tablespoons poppy seeds
6 small tomatoes, as close to the bun size as possible

TO MAKE THE ROASTED RED PEPPER MAYO

In a small bowl, combine all the ingredients, and chill until needed.

TO MAKE THE PATTIES

Preheat the oven to 400°F. Lay out the bacon in a single layer on a baking sheet lined with foil or parchment, and cook until crisp, 12 to 15 minutes. Transfer to a paper-towel-lined plate, and allow to cool completely. Break off 24 slider-sized pieces, about 2 inches, and set aside.

Chop the rest of the bacon until fine. In a large bowl, mix the chopped bacon with the ground beef, shredded Gouda, salt, paprika and ketchup.

Place the buns on a baking sheet. Mix the melted butter with the ancho chile powder, and brush the tops and sides of each bun. Sprinkle with poppy seeds. Bake for 6 to 8 minutes or until golden brown. Remove from the oven, and set aside.

Place a clean-rimmed baking sheet in the oven, and raise the temperature to 425°F.

On a cookie sheet lined with parchment, divide the meat mixture into 24 even balls. Gently smash them with a small glass to form patties about 2 to 2½ inches in diameter. Transfer the sliders on their parchment to the heated baking sheet.

While the patties are cooking, slice the tomatoes thinly and set aside.

Cook the patties for 4 minutes, then turn them over. Place a piece of the reserved bacon on each patty, and cook another 3 to 5 minutes until cooked through.

TO ASSEMBLE THE SLIDERS

Put about a teaspoon of the pepper mayo on each bun bottom and top. Place a slice of tomato on each bottom, top with a patty and then a second slice of tomato. Place a bun top on each slider.

Secure with a cocktail pick if desired.

FLYING BROOMSTICK CAKE POPS

Broomsticks are an important means of magical travel – and fun, as they are used in the wizarding world’s most popular sport, Quidditch. A delectable blend of sweet and salty, this brownie-based cake pop is sculpted to look just like your favorite brooms from the films. They will surely sweep your guests right off their feet.

WHAT YOU WILL NEED:

(Yield: 12 to 14 pops)

FOR THE BROWNIE CAKE

6 tablespoons ($\frac{3}{4}$ stick) butter
2 ounces unsweetened chocolate, broken up into small pieces
1 cup sugar
2 eggs
 $\frac{3}{4}$ cup flour

FOR THE CAKE POPS

5 ounces caramel bits, melted
1 tablespoon water
15 ounces semisweet chocolate melting wafers
One 11-ounce bag butterscotch chips
12 to 14 long pretzel rods

TO MAKE THE BROWNIE CAKE

Preheat the oven to 350°F, and line an 8-by-8-inch baking pan with parchment, allowing it to overhang slightly.

In a large microwave-safe bowl, microwave the butter and chocolate together in 10-second increments, stirring in between bursts. When the chocolate is completely melted and the mixture is smooth, add in the sugar, stirring to incorporate. Add the eggs 1 at a time, mixing thoroughly after each addition. Add the flour, and stir until totally incorporated.

Pour the batter into the prepared pan, and bake for 25 to 30 minutes or until a cake tester comes out clean or with only a few crumbs. Allow to cool for 15 minutes, then use parchment to lift the brownie from the pan. Refrigerate for 30 minutes or overnight.

TO MAKE THE CAKE POPS

In a microwave-safe bowl or measuring cup, microwave the caramel and water together in short bursts, stirring in between, until completely melted.

In a large bowl, use a wooden spoon to break up the brownie into an even, coarse-crumb texture. Add the melted caramel, and stir until well combined. Refrigerate for 30 minutes.

Prepare 2 cookie sheets with baking mats or parchment. Have your pretzel rods close at hand.

Working with about 3 tablespoons of chilled brownie mixture, use your hands to form a thick patty out of the crumb mix and place a pretzel rod about halfway through the center of the top of it. Close the brownie mixture around the rod and shape the remaining portion into the “bristle” section of the broom. Gently press the bottom of the broom onto the cookie sheet creating a flat bottom. Lay the broom down and repeat with the remaining pretzels and brownie mixture.

Recipe continued on the next page...

FLYING BROOMSTICK CAKE POPS

Continued from previous page

Freeze the broom pops for 30 minutes.

In a medium microwave-safe bowl, microwave the semisweet chocolate in short bursts. Stir frequently, and be careful not to overheat.

Dip each frozen broom pop into the melted chocolate. Use a spatula to gently coat the entire “bristle” portion. Make sure to get chocolate on the joint between the pretzel and the brownie mixture to seal the cake pop to the pretzel rod. Shake the pop gently over the bowl to remove excess chocolate, and set the flat bottom back on the cookie sheet so the broom is now standing.

Repeat with the remaining brooms until they are all coated in the dark chocolate. Save any remaining chocolate, and set aside.

In another microwave-safe bowl, microwave the butterscotch chips in short bursts, being careful not to overheat.

Use a pastry brush (silicone works best) to brush the melted butterscotch chips onto the cake portion of each broom pop. Work slowly in long strokes, and let the lines show to create a bristle texture. Repeat with all the broom pops.

If necessary, gently reheat the semisweet chocolate. Fill a pastry bag with the chocolate, snip a small hole in the end, and pipe the broom bands onto each brownie pop. Allow 10 to 15 minutes to set.

MAKING THE FLYING BROOMSTICK CAKE POPS

TIP

These can be stored in an airtight container separated by parchment for 3 to 5 days. Or they can be packaged in cellophane bags to give as favors.
